It is needless to say much fo regard to the battery raised and commanded by Capitala Edward Bouton. He is a Calcago man, the inventor of Bouton's breehloading cambu, and has already gained among his fell worficers and soldiers, an enviable reputation for cooliers, courses, persyerance, nonnecessity. and has already galeed smorp his fellow of ficers and soldiers, an enviable reputation for coolness, course, perseverance, promptness and celerity, and all the qualities necessary to constitute a first class officer. [Special Correspondence of the Chicago Telbune Jackson, Tenn , August 8, 1962, Jackson, Team, Angust 8, 1882.
Having a little experience in the conducting of affairs of the army in this district, I intru knoon you a few lines by way of letting you know how the new orders and acts of Con

gress are regarded by the officers in West Tet.nesce.

The people of the North and the soldiers of the army heiled with gladness the new order of things so la ely luaugurated by those in power, but judge of our chaprin and disappointment, when to each regiment of this division orders were read to exclude all negroes from our lines, and to retrain from taking the ruit or corn that is now in abundance through the country. The term confaccation means one thing in the North, and something widely different in these parts.

The planters of Teunessee have planted no cotton this year, but immense corn crops are

of Huntaville, and the left is four miles from Nashville-handpuriers of the regiment at Huntaville. The regiment is extired along this whole distance in squads, guarding bridges, culverts and tanks, but excluded from stations of size. What a situation for the 19th! What a fix for company A—old company A—to be placed in! Here we have taken our first lessons with the spade in the srection of a stockade for the better protection and debense of the position. You will readily believe that these mon, who have uncomplainingly endured the most latiguing marches and the most severe hardships, shrunk from such work with bitter words and more

tations, who have very little work to do at this season, and would be glad to work for us. The people in this vicinity are the most bitter and bistant secessionists I have yet seen. They are all orders domirers of Gen. Buell!

The officers of the regiment have, with a free exceptions, tendered their resignations. Only Ool. Scoti, 's and Adjutant Miller's were accepted. Col. Scoti, during the eight months he has commanded the regiment in active service in the field, has gained the confidence, respect and affection of his command, both officers and men. His resignation is a great loss to the 19th, but the circumstances which occasioned it, left him no other honorable alternative.

occssioned it, left him no other honorable alternative.

The 19th has always done its duty, and always w.d. But we cannot be reconciled to our present position, so different from any we have ever before held, and we adjure our friends in Chicago, and all fillinois, to use their influence, which must be successful, to have us placed again in the front where we have always been, or else taken clear back, to reorganize and cummence a new capter.

I dread to think of the sickness that mast prevail among my men during the coming menths of August and September, should we remate in this unhealthy location, which, may beaven forbid. The boys keep up a cheerful appearance, and are vigiliant and thorough in the discharge of their duty, but they are restless and discontented. Hoping that you may soon hear of us in a position satied to our menis and our desires, where we can serve our country with honor to ourselves and to Chicago.

The War Spirit in Buds, Itl.

Buns, Illinots, Ang. 13, 1863.

The patriotic citizens of Buds and vicinity, not wishing to be outdone by any of their sister towns, and fully aroused to a sense of their duty in this hour of the nation's peri their duty in this hour of the mation's peril, assembled at the Baptist Church on Tu-saday evening, 12th lists, for the purpose of raising volunters to all the last call of the president for 600,000 men.

The object of the meeting being stated by

the chairman, M. G. Lorcine, esq., on call, Geo. M. Radeliffe, our honorable circuit clerk, came forward, and after being introduced, reponded in a brief, telling and patriotic speech rging the necessity of speedily filling up the anks of the companies organizing in Bureau they came forward voluntarily, within a few days drafting must be resorted to. Mr. R. was followed by Mr. Herron, of Princeton, and Brown of Wyanet, and lastly, though not least, by our worthy station agent, Mac Mac-Callum, esq., who is always on hand with a tunely word, and never with a more desirable Callum, esq., who is always on hand with a timely word, and never with a more desirable effect than on this occasion. Mae believes that money is one very important element in cyrrying on a war. In fact the very sinews; and these were forthcoming. The muscle stood ready, and to make an application of his argument, estated that he held a ten dollar bank note in his hand, which he proposed to give as abounty to the first mar that came forward and enrolled his name. This was the practical way of accomplishing the desired effoct as faila bounty to the first mar that came for ward and carpolice his name. This was the practical way of accomplishing the desired effect as full to be seen as plenty as robbin in Disignation was announced that twenty doffars additional bounty would be given to each roorsit, it was difficult to tell which would win the raccasinew or muscle—they both made such admirable time and I believe the judges flushy decided it was an even race and proposed to try it over again at some future day. The result of the meeting was a subscription of some \$550. Of course, Mears, Editors, our modesty forbids beasting, but if you know of any otter little town with an equal number of inhabitants that have furnished more of the sinew and muscle, just let us know and we sill try our, hand again. The meeting was truly a patriotic one, and proved the people's devotion to their country and a determination to maintain the government at whatever cost of blood and treasures. There was one little circumstance that occurred during the meeting, although an unpleasant one, justice compelis me to call attention to. Two or through of our would be noted citizens, men of wealth who have good reason to believe they are exempt in case of draft, and who are in favor of a vigorous prosecution of the war, providing it does not affect their pockets, who believe money paid to volunteers as a bounty is a waste of tressure, and if the county cannot take care of the families of those who sacrifice their lives upon the altar of their country, they should be sent to the poor house. Writhing under the just indignation of a 1-yral and magnanimous people, binght an opportunity so vinclicate their liliputian principles, which, thesis God, the people were in no mode to

The Morale of the Late Battle.

["Occasional" to the Philsdelphia Press.]

Washington, August 13, 1862.

The better judgment of observing men in this quarter is, that our future operations in Virginia will be advantageous to the federal arms. The fight of Saturday last was not only an evidence of the wise and admirable management of the most succeptionising and least captious solder in the service, General N. P. Banks, but a proof that the rebel plan of a new raid into the valley and upon Washington has been checked. How far the retreat of Jackson and Ewell is a light, a short time will establish. Military authorities concur in the bellef that it was a necessity.

Exemptions from Military Duty.

The following is an official summary of the military exemption law of the United States:

That the Vice-President of the United States: The officers, judicial and executive, of the government of the United States; the members of both houses of Congress and their respective officers; all eastom-house officers, with their clerks; all postofice officers and stage drivers who are employed in the care and conveyance of the malls of the United States; all forrymen employed at any ferry cn the post road; all inspectors of exports; all pilots; all mariners actually employed in the sea service of any citizen or merchant within the United States; and all persons who now are, or may hereafter be extracted to the control of th The Exercises of Daaren Sounds and the belief that it was a necessity.

The Exercises of Daaren Sounds and The Montreal Gastie, while inclined to disparage the Union cause, concedes the superiority of drafted soldiers. It says.—'A draft will mainly fall upon the agricultural classes, upon mee hured to fatigue and exposure, and able, from their general strongth, to draft will mainly fall upon the agricultural classes, upon mee hured to fatigue and exposure, and able, from their general tree results of the clites. Ket, it may be urged, that men forced into the service, at these nor will be, will not fight with the courage of the men who voluniarily came forward to put down the fourth. This may apply in some cases, to persons residing in the Coward of the theorem of the conscription in the conservation of the service of the conscripts failed to display fortime and courage. What was the old Guard at Waterloo, when it refused to surrender, and disd with the historic words upon its lips, "La Garde ment maidele as a read gas? What but a body of conscripts? What were the Russums who fought in the Crines with a doggedness and determination which almost paid the deeds of the most courageous and hardy troops in modern times, but conscripts? People may say what they will, deduct all they may on the score of unwillingness, but we cannot close our eyes to the fact that the drill master will have splendid material to work on in the new levy." ployed in the sea service of any citizen or merchant within the United States; and all persons who now are, or may hereafter be, exempted by the laws of the respective States, shall be, and are hereby exempted from militial cuty, not-eithstanding their being above the age of cighteen and under the age of forty-five years. [Laws of U. S., chap. 38, 8 May, 1793.]

"The following persons are also exemptive.: Postmasters, postriders and drivers of the snall stages (chap. 64, 3 Maych, 1855); assistant postmasters and clerks regularly engaged in postoffices (chap. 270, 2 July, 1859); clerks employed in the several departments of the government (Exparte Smith, 2 Cranch, 1895); clerks employed in the several departments of the government (Exparte Smith, 2 Cranch, 1895); clerks employed in the several fire companies of the G. C. during a warrant officer (Sanford & Boyd, 2 Cranch, 28); assimilater at Vanch, 1397; silens (Slade vs. Minor, 2 Granch, 1397; silens (Slade vs. Minor, 2 Granch, 1397; Justices of the peace (Wise vs. Wethers, 2 Granch, 280); professions, turiors, sitewards and students of the different seminaries of learning in the D. C., except in the time of war (chap. 30, May 4, 1816); telegraph operators, while employed as such (order of Secretary of War, 1863)."

Major W. C. Moreau, of the Kentuck; cayairy, has a short way of dealing with the rebels around Eminence, Kentucky, where he is stationed. He is ordered to levy on "se is stationed. He is ordered to levy on "seceah" horses for the army. The "secesh," in
anticipation, run them off. The Major finds
it out, and goes and takes two or three
slaves as security for the return of the horses.
The horses always come back. He finds the
remedy an excellent one, infalliable and of
speedy operation.

The N. Y. These thinks that not over
150,000 of the 200,000 volunteers will be enlisted by the 15th inst., and it warms the President not to listen to the calls made for the
postponment of the draft. Volunteering is

ident not to listen to the calls made for the postponment of the draft. Volunteering is uncertain, while the draft may be relied upon, and these are not the times to put off the un-certain for the certain. Let us have no disap-pointment this time, and no expensive so re-ing of appearances.

It is reported that Gen. McClellan has taken measures to arm the 4,000 returned prisoners from Richmond, who are able to go late the field. These men will, therefore, not get far away from the place of their late incar-

Tribuse, amounces that he will issue a new daily paper in that city, soon, to be called the Daily Menter.

25 The publishers, proprietors and journeymen of the Cunton Weickly Repter have all explisive have all explisived and gone to the war. The hands in the Pastagough, of Recommenter, have all enflated. The Havens Built-day has subsided and its editor enlisted as drain image.

THE GALENA RAILEOD GUARDS .- We lieve it will be conceded that among the first of the raliroad employers to suggest the for-mation of the Railroad Regiment, was H. M. Blake, superintendent of the paint shop of the Galena Railroad Company. He recruited his ecupany in four days, and it was first in c up, and is composed of as fine a set of boys as ever stepped in army shoes. They have just elected officers, as follows: Captain II. M. Blake; Lat Lieut. W. A. Sampson; 2d Lieut. J. A. Jeckson. Captain Blake is wor-thy of his post, and his men of him.

Carrais Prinon's Contant.—The company raised by Captain Prior for the first Board of Tride Regiment, now quartered at Camp Hincock; near Cottage Grove, held an election for officers Saturday morning, which resulted in the unanimous choice of Réwin C. Prior for Ceptain, J. H. Murray Farst Lientenant, and F. Stout, Second Lleu'enant. This company numbers 101 members, and is one of the best appearing bodies of men we have seen gotten up in Chicago. Captain Prior has labored with untiling energy to originize this company, and the result of his associate of the pasile. That he and his associate there will display the same efficiency in drilling the crops as his been manifested in its organization, no one who is personally acquainted with them can doubt.

Boand of Thabe Bartent.—This splendid company is making wonderful progress in artilliery drill, sud both officers and men show an unusual anxiety to staim profeiency. Capt. Blokes has spared to pains to matract them in all the movements, and although he has been tendered a coloxicle in one of the Board of Trade Regiments, we are assured that he will not leave them till the plattery is able to take care of likelf.

The company is excamped in a beautiful grow, scuth of Camp Douglas, and a stroll through it will satisfy the most flatidious at to the character of the mire who are its occupants. Everything is as clean as a "new pin," and although there is as much hilarity and good feeling among them as can be found anywhere, no one seems to forget that the perfect soldier is a true gent-luman. As there is a fire sprickling of printers in the battery, we feel proud of it. In the absence of the expetant, we are indubbed to orderly isogenal Sections.

The Past Three Mouths in New Orleans.

The Della, of the 3d inst., contains a leader bearing the above caption, which contains much that is of interest. It says:

For three entire months "the flag" has wared over the city of New Orleans. It has excured to the inhabitant peace, and, as compared with their precious condition, plenty. It has deferred to them prosperity, resulting from trade, if they were willing to accept it. It has said in return for these benefits nothing beyond respect and a cheerful obedience to the orders of these wich have the high privale of carrying and defending it.
